#DOING BUSINESS THE RIGHT WAY

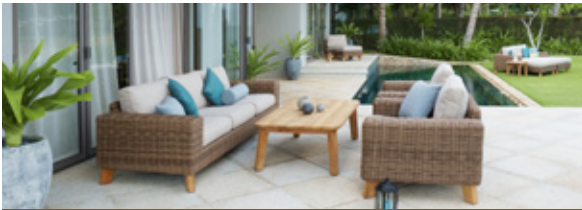

In a world of mass production, we recognise the importance of **genuine design** input and **innovation** in the creation of high quality, long-lasting and environmentally responsible products that help you make the most of your time outdoors.

Doing business the right way is the cornerstone of our business vision; we believe that it is **the only way** of operating and the approach can be seen in everything we do. From the sourcing and processing of raw materials, through production and design stages, until the final product is delivered to your door.

100% OWN PRODUCTION

An important aspect of sourcing products ethically relates to the control of the supply chain. More than 5,000 dedicated employees in an area of over 150,000m² of our own facilities in Brazil, Vietnam and Indonesia make this possible every day.

ITEMS OVERVIEW

136

BAHAMAS

High end supreme comfort with a contemporary look

Handwoven in exclusive all weather wicker combined with generous reclaimed teak accents and topped with body hugging cushions wrapped in durable olefin fabric. The Bahamas is another signature range ideal for large spaces, finished in earthy tones combined with teak make this range ideal for long summer days in your outdoor space.

Our specially formulated blends give the Petan® fibre its unique look and extra strength. It also produces a surface that is extremely comfortable to sit on whilst being able to withstand heavy use. Petan® has excellent colour fastness and is also very flexible, meaning complex weaves can be achieved to create beautiful designs.

PALAU

A perfect balance between comfort and design look

Made of Slate Aluminum, handcrafted to perfection and with a perfect balance between shapes and geometry. Endured with a combination of virgin FSC teak; Palau is LifestyleGarden's top-end Aluminum range, a unique and robust signature edition for the most luxurious outdoor spaces.

All LifestyleGarden® aluminium products are protected with Duracoat®, a multi-layer powder-coating that is oven cured to provide a great-looking finish that is resistant to all kinds of weather conditions.

NASSAU

A festival of colours for the spirited

Inspired by the colourful houses of this Caribbean city, Nassau is the perfect combination of pastel colours mixed with eucalyptus or teak hardwood. This family is ready to spice up every urban space, big or small and to light up your outdoor area. Nassau is fresh, young and ready for the best times in your garden.

Duresin® is our unique formulation of 100% virgin polypropylene and is ideal for outdoor use. Duresin® contains no harmful chemicals and can be recycled without producing waste or damaging the environment.

IPANEMA

Supreme comfort in hand-woven rope

For those times that you want some genuine relaxation without leaving your outdoor area, try the Ipanema. Teak, aluminium, olefin rope and Duranite are used in combination across the range to stunningly sophisticated effect, resulting in a mixed media range that ticks all the boxes.

Our Rope is made from olefin and is thick, strong and hard-wearing - it is woven around the frames by skilled craftsmen for seating that is both generous and supportive.

Powder coated aluminium frames will not rust and are strong, sturdy and stable but also lightweight enough for ease of movement.

EVE

Pure teak at its best

Make your outdoor space a paradise with the new Eve collection: our first range to be made exclusively from teak. Drawing inspiration from iconic mid-century Nordic design, the classic curved and tapered lines of the Eve conjure a modern elegance that is enhanced by smooth profiles and FSC™ teak. The traditional rustic glow of the Teakwood is beautifully balanced by olefin cushions in a striking emerald green, creating a look that blurs the line between the classic and contemporary.

The luxurious deep cushions are made from premium olefin for comfort and durability.

All Teakwood used is FSC™ certified virgin teak from a responsibly managed plantation in Indonesia.

PORTALS LIGHT

A sophisticated and contemporary take on outdoor living

The perfect mix of robust cast aluminium and FSC™ teak, combined with premium grade olefin cushions for comfort and a contemporary feel. The Portals light range offers endless possibilities due to the modular seating system, in addition to a range of options for dining in style.

The Portals lounge set offers numerous configurations and seating options with just a few pieces.

PORTALS DARK

Eye-catching design with contemporary styling

The Portals dark range is characterised by ergonomic lines and unique shapes that have been created without compromising stability and strength. Accented with virgin Indonesian FSC™ teak for a traditional touch and combined with premium-grade olefin cushions for comfort and a contemporary feel. The Portals range offers a sophisticated and contemporary take on outdoor living.

The Portals lounge set offers numerous configurations and seating options with just a few pieces.

The Portals range is manufactured using die-casting technology, which allows for ergonomic design and the creation of unique shapes like the banyan tree showcased.

MARTINIQUE

Delicate design and robust materials

Perfect for entertaining or everyday relaxation in the outdoors at home, the Martinique is an eternally elegant addition to the collection. A perfect blend of delicate rounded edges and deep comfortable cushions, the seating is relaxing and versatile, rust-resistant frames and fully recyclable Petan®.

WHY OLEFIN?

Olefin offers supreme durability due to its fibres containing less moisture which allows it to dry more quickly than other textiles. Furthermore, Olefin is resistant to abrasions, stains, sunlight, fire and chemicals. These properties, combined with excellent levels of colour fastness, make Olefin the recommended choice of LifestyleGarden® for long-lasting, great looking coverings for your outdoor furniture.

ARUBA

Bringing comfort and contemporary styling to your space

The Aruba features a delicate double woven Petan® finish in a timeless tone of light grey paired with elegant cushions for comfort and longevity. Cutting edge design can be seen in the ergonomic flow of the seating which conjures a comfortable and contemporary feeling. Whether you have a compact terrace or more spacious garden, the Aruba has solutions for all types of outdoor space.

Our Aruba Corner Set and its innovative adjustable-height table, gives you the best of both worlds. The set combines the comfort of a sofa with the functionality of a dining set.

Low height to enjoy coffee with friends...

... or a higher level for al fresco dining

MORELLA

Comfort and relaxation assured

Following the success of the Solana range, the Morella family makes use of the same combination of materials but with a design twist and a warmer colour palette. The entire range is maintenance-free, meaning it will continue to look great and last for years to come.

Duraboard® table tops are made from recycled FSC™ eucalyptus sawdust and polyethylene resin, extruded to create a strong, durable structure. This is then treated and sealed with a 10 layer coating system to ensure no stains or scratches will occur when in use.

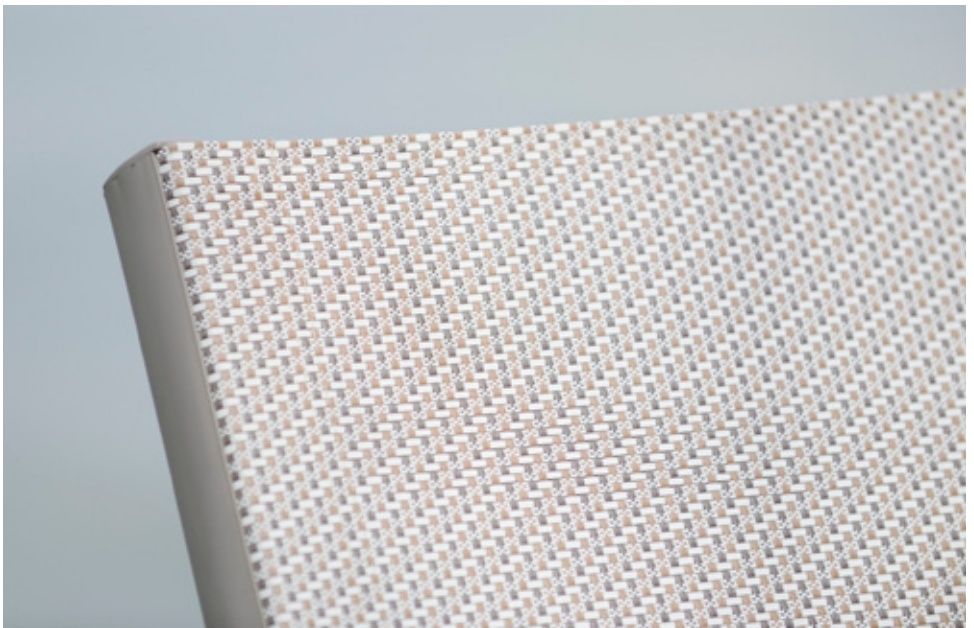

MAUI

The reinvention of the classic

A re-interpretation with a twist of our best sellers, Maui mirrors the colour palette of its partner range Morella. This time featuring wooden table tops for an even warmer feeling while keeping the hardwearing properties as it is combined with aluminum frames. Low-maintenance comfort for your outdoor space so you can focus on your leisure time.

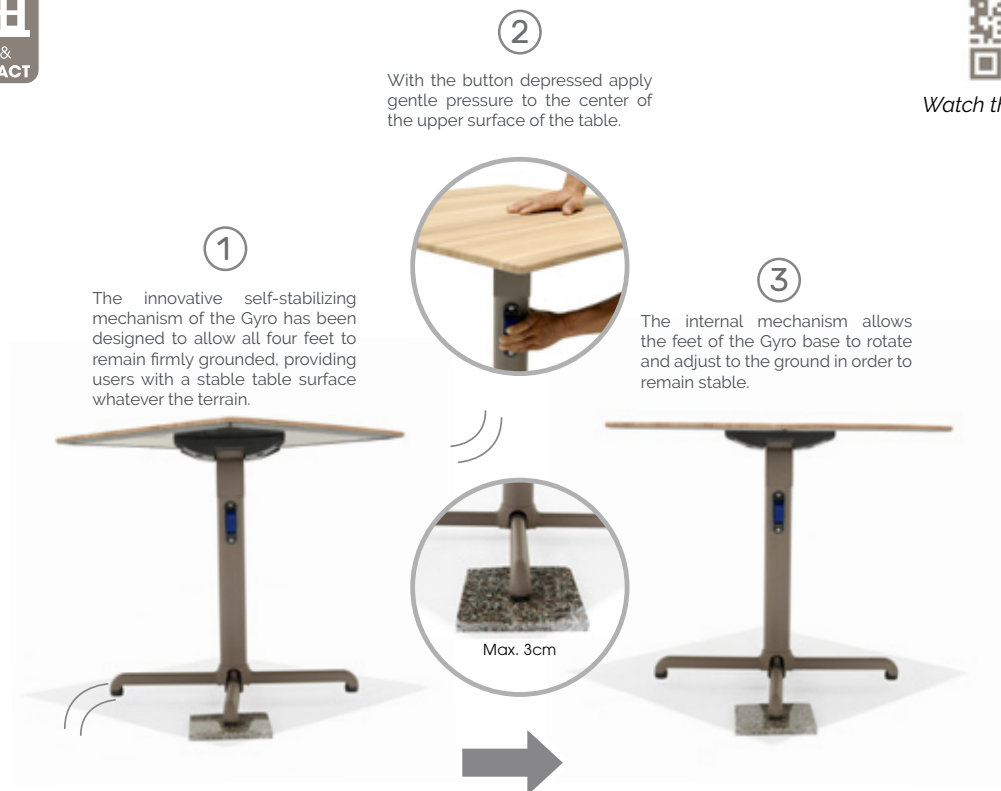

Watch the video here!

Hold the top and rotate the legs so they are parallel for easy carrying and storage!

SOLANA

Great looks and straightforward sophistication

The perfect union of aluminium and Duraboard® make this a light, robust and maintenance-free range because we know you want to focus on enjoyment and relaxation. Made to last for years to come, make the Solana part of your outdoor family.

Made of rust free Aluminum and sealed Duraboard® tops, solana range is **100% maintenance free**

SALOMON

Comfort and versatility with contemporary design

Another re-interpretation with a twist of our best sellers, Salomon uses the same colour palette of Solana. Topped off with a mixed wooden slat table top, the Salomon offers a unique aesthetic dining experience. You can mix and match both ranges for further options to complete low-maintenance solutions for your outdoor space so you can enjoy your garden in carefree comfort.

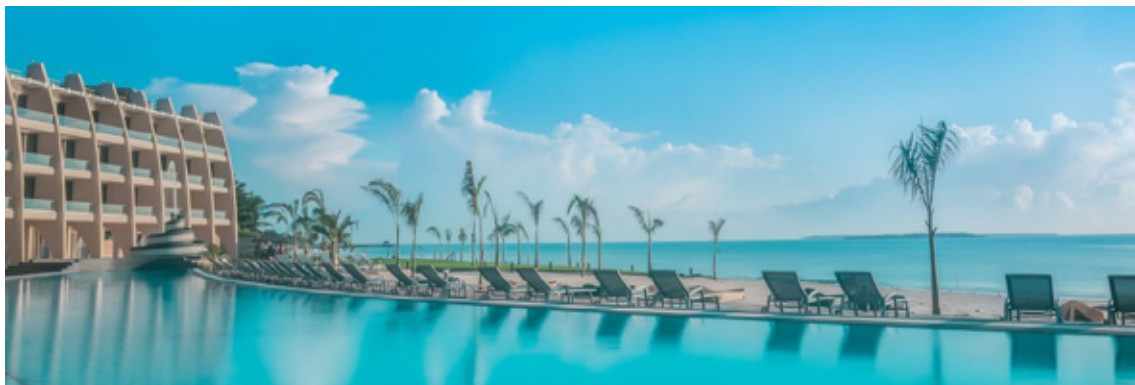

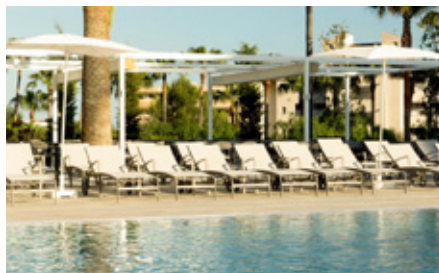

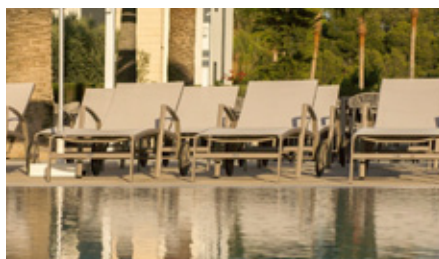

CONTRACT

We know your projects are important and we have ranges suitable for contract use, ready to enlighten the finest outdoor spaces. We have a proven record of success on projects around the world with items that are reliable, heavy duty and resistant to extremes. For more information, you can find this logo in the items overview or contact your local representative for customised projects.

MATERIALS

Teak FSC™ is a superior wood species renowned for its golden colour and weather-resistant properties. In addition to the teak grown on FSC™-certified plantations, LifestyleGarden manufactures products exclusively from recycled teak wood components sourced on the island of Java, Indonesia. Teak ages beautifully into a silver-grey colour but the original appearance can be maintained if treated with a suitable teak sealer oil.

Duragrain® is a dual-layer coating for wood. This technology provides protection for the hardwood while allowing the natural grain of the wood to be appreciated through the unique coloured finish. Duragrain® requires no maintenance but should it become dirty, greasy or oily it is recommended that a brush or cloth is used for easy removal.

LifestyleGarden® uses **Aluminium 6063** for products, a material commonly used for boat building and water-sensitive shore applications, as it is ideal for outdoor use. Following the construction of the frames, a multi-layer powder-coating is applied before a final step of oven curing. If the finish should become soiled, cleaning with soap and water will be sufficient to make it look great once more.

Duresin® furniture uses 100% virgin polypropylene to create hard-wearing, recyclable and maintenance free products. Once formed, it becomes extremely durable, creating long-lasting furniture with UV resistance. All Duresin® products contain no harmful chemicals and can be recycled without producing waste or damaging the environment. Duresin® products require no maintenance. Soap and water is sufficient for cleaning.

Rope has strength and durability in addition to flexibility, creating a comfortable yet hardwearing material. Rope is made of Olefin and is suitable for year round use in all types of climates, and high levels of UV stability enable it to retain its original colour.

Dralon® fabric has been proven to be more resistant to extreme weather conditions than standard polyester fabrics. This makes the cushions easier to clean and extremely resistant to stains, including wine and oil, thanks to the Pymagard® finish.

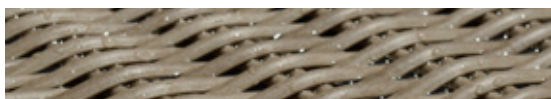

Duraboard® is an environmentally friendly material that is durable, recyclable, highly UV-resistant and has a unique surface finish. Made of high quality eucalyptus sawdust and polyethylene resin, the surface is subjected to a customised UV and scratch resistant treatment. Duraboard® requires no maintenance at all during its lifecycle. If the Duraboard® product becomes dirty, cleaning with soap and water is sufficient.

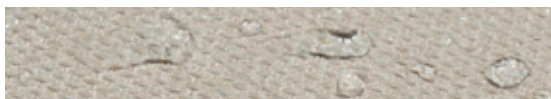

Duranite® is a high-quality fibre cement board, coated with a multi-layer treatment that contributes to a scratch-resistant, supremely weather-resistant and low-maintenance surface that retains its colour due to a customised UV treatment.

Duranite® is supremely durable and requires very little maintenance as it has been coated to withstand all types of weather and outdoor environments throughout the year.

Petan® is a synthetic rattan fibre that is durable, weather-resistant and has a natural colour and feel. It contains no harmful chemicals, making it 100% recyclable. It also has excellent colour fastness and is able to withstand heavy use. Petan® requires no maintenance. Simply wiping the surface with detergent and a clean, damp cloth will restore the Petan® to its original condition.

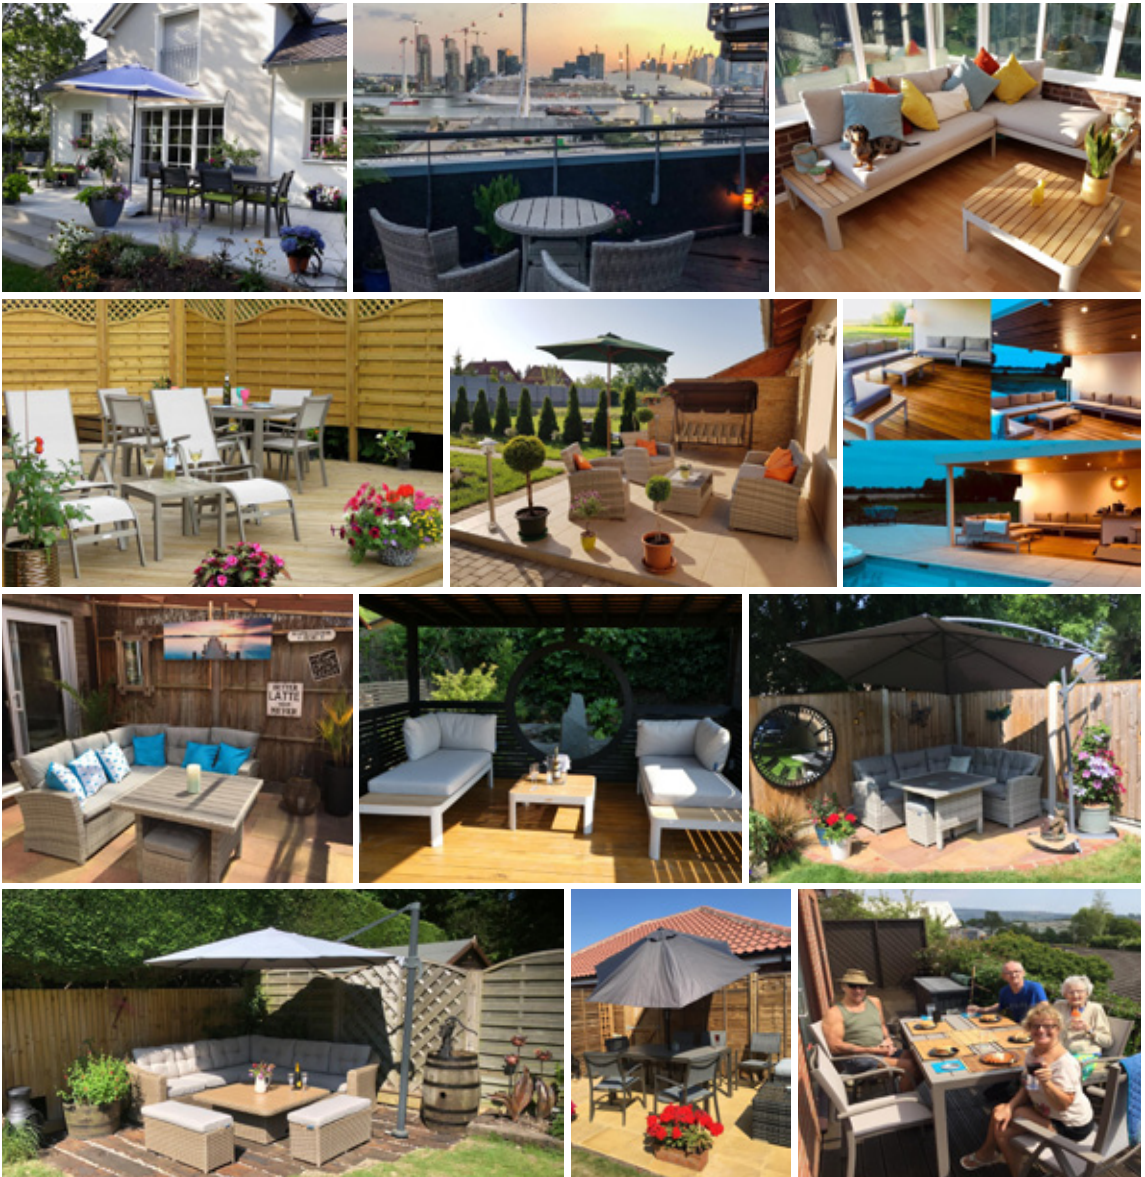

LifestyleGarden only uses **Fabrics** with excellent weather-resistant properties for extreme durability in all climates. Dralon, olefin and polyester are all used for their high-quality performance and made of woven structures that resemble a linen fabric. All fabrics have excellent colour fastness and are extremely durable. Soap and water and a wet cloth should be used to remove any stains or soiling.

www.lifestylegarden.com/warranty

LifestyleGarden uses materials that are formulated, manufactured and tested to offer superior performance on outdoor environments. We stand by the materials used and offer an extended **warranty** on our products. To Activate your warranty go to www.lifestylegarden.com/warranty and register your product.
